PROFESSIONAL SUMMARY

Full-stack and AI engineer who builds and ships production LLM-powered and agentic systems end-to-end — FastAPI and Python on the backend, Next.js and TypeScript on the front. Two years of industry experience across multi-tenant platforms, RESTful APIs, and AI integrations, plus a portfolio of independently shipped products including an 8-agent code-migration pipeline and an on-device AI mobile app. Currently completing a Master of Information Technology in Sydney, graduating Nov 2026 with full Australian work rights on graduation. Open to graduate, full-time, contract, and hybrid roles.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, PHP
AI & LLM Engineering: LangGraph, LangChain, Multi-Agent Systems, RAG, Async SSE Streaming, Claude API, OpenAI API, Groq, OpenRouter
Backend: FastAPI, NestJS, Node.js, Express.js, Django, REST API Design
Frontend: Next.js, React, React Native, Expo, Tailwind CSS
Data & Infrastructure: PostgreSQL, Supabase, MySQL, MongoDB, Docker, AWS, Vercel, Railway, Git, CI/CD
Testing & Methods: Pytest, Jest, Agile/Scrum

EXPERIENCE

Freelance Full-Stack Developer *2025 – Present*
Self-employed · Remote

- Developing SQRLY, a multi-tenant point-of-sale SaaS platform, as a part-time developer for I-Dream IT Solutions (Philippines) — four-repository architecture (admin and merchant; frontend and backend), built on NestJS and Supabase with shared-schema multi-tenancy and row-level security.
- Built a web application for an automotive repair business (Niks Prime Automotive) handling customer bookings, service tracking, and invoicing.

Software Engineer *Jan 2024 – Feb 2025*
Lightweight Global Tech Solutions · Philippines

- Built and owned full-stack development of multi-tenant utility-billing and ERP platforms (Express.js, Next.js, TypeScript).
- Developed a RESTful API in Django for a BPO locker system with automated device and attendance tracking, supporting 200+ daily active users.
- Built a beneficiary-management frontend in Next.js, improving interface responsiveness and usability.
- Prototyped an AI-powered proposal-generation agent integrating LLMs, reducing the team's manual drafting time.
- Optimised a customised insurance system, improving database query performance and reducing reporting inconsistencies.

Freelance Full-Stack Developer *2022 – 2024*
Self-employed · Remote · USA, Philippines & Australia

- Delivered custom web applications for clients using Django, Laravel, Express.js, and Next.js, owning each project end-to-end from requirements to handover.

PROJECTS

Mikhai — PHP-to-Laravel Migration Copilot github.com/ernestsacdal/multi-agent-laravel-migrator

- 8-agent LangGraph pipeline that analyses legacy PHP codebases and generates Laravel migration plans with async SSE streaming. FastAPI, Qwen3-Coder and Llama 3.3 via OpenRouter and Groq.

PreTriage — AI Patient Pre-Triage System github.com/ernestsacdal/pre-triage

- Real-time triage assistant that turns patient-described symptoms into structured pre-triage output. Next.js and FastAPI with a Socket.IO real-time layer, Groq/Kimi K2 reasoning, and ElevenLabs voice.

Wednesday — Grocery Price-Prediction App apps.apple.com/au/app/id6786205324

- Live on the iOS App Store. Engineered the Python data pipeline ingesting ~40k products daily from public sources; statistical predictor backtested over ~44k historical windows to a 73.5% hit rate on high-confidence forecasts, with accuracy continuously audited against retailer ground truth (100% Coles price accuracy).

EDUCATION

Master of Information Technology *Mar 2025 – Nov 2026*
Crown Institute of Higher Education · Sydney, NSW

- Capstone: AI-based risk-scoring and rules engine, developed in collaboration with an industry partner.

Bachelor of Science in Information Technology *2020 – 2024*
PHINMA Araullo University · Philippines
